

## New Hampshire Department of Safety Division of Homeland Security and Emergency Management

### Mitigation Success Story

#### Lovejoy Road, Enfield, New Hampshire

Following the award of funding from the Hazard Mitigation Grant Program (HMGP) the Town of Enfield removed two existing 3' diameter culverts and installed a new precast concrete 38' span bridge.

Prior to mitigation, the crossing was prone to over-topping, which caused repeated road washouts and temporary closures. Lovejoy Brook Road is a dead-end road that provides the only access to two businesses, one single family home, and two municipal water supply wells.

The new concrete bridge improves hydrologic flows and has been tested by major rain/precipitation events and performed as expected, thereby eliminating the problems that existed previously.

#### Before Mitigation

#### After Mitigation

**Project Total Cost: \$338,100.88**

**HMGP Federal Share \$221,961.00**
