Mitigation Success Story

Haynes Brook Culvert, Franklin, New Hampshire

Following the award of funding from the Hazard Mitigation Grant Program (HMGP) the City of Franklin replaced an existing 5' by 3' concrete box, with a new, appropriately sized 8' by 3' culvert. The replacement reduced/eliminated the potential for flooding, which historically resulted in the closure of Central Street, Route 3, and Route 11 preventing east-west traffic flow through the area.

The improved culvert has been tested by major rain/precipitation events and performed as expected, thereby eliminating the problems that existed previously.

Before Mitigation

After Mitigation

Project Total Cost: \$574,546.03

HMGP Federal Share \$303,375.00
